

Loftus Peak Global Change Portfolio

Global Change. Listed Investments. Daily Liquidity.

Monthly Investor Letter
November 2016

The Loftus Peak Global Change Portfolio invests in listed disruptive businesses globally. The portfolio provides geographical and sectoral diversification which lowers the concentration risk inherent in the typical Australian portfolio, with its heavy skew toward banks, resources and the Australian dollar.

Review & Outlook

The portfolio manager estimated return gross* of fees was +3.86% and alpha +0.17% above the benchmark (MSCI AC World Net Total Return Index in Australian dollars). The benchmark returned +3.69% for the month. On an annualised basis since 30 June 2014 inception, the portfolio has returned +18.98% per annum, outperforming the benchmark by +7.90% per annum.

The US election result caught many, including us, by surprise, with the failure by the polls to capture voters who choose not to participate in polls. Still, the markets have taken the view that Trump will be good for business by lowering tax rates and removing regulation. We will not argue.

However, the idea that Trump will be negative for disruption investment is probably unfounded. That which is already in train, such as the Tesla battery factory or the Amazon investment in logistics and distribution, cannot be stopped. Competition, in the form of lower prices or a better product to customers, is disruption's best friend, and it is likely that these businesses will continue to win. The volatility of the markets there was mitigated by the performance of the Australian dollar, which depreciated by -2.8% and so helped the portfolio.

*Manager estimated returns. The Portfolio Benchmark is the MSCI ACWI (net) (as expressed in AUD from Bloomberg). Portfolio Inception date is 30/06/14.All returns are shown to two decimal places. Returns for the periods more than one year are annualised. Total returns include realised and unrealised gains. Valuations are computed and performance reported in Australian dollars. Gross-of-fees performance returns are presented before management and performance fees but after all trading expenses. Net-of-fees performance returns are presented after management and performance fees. Returns are based on the theoretical performance of a portfolio which implemented the Model Portfolio based on simplifying assumptions and stock weightings. Actual individual returns of each client's portfolio will differ depending on factors such as date of initial investment, timing of transactions, contributions and withdrawals, fees and any customisations. Past performance is not a reliable indicator of future performance and may not be achieved in the future. Each client should also take into account their own taxation situations. All information provided in this Report is correct as at the date of this Report.

Portfolio Contributors and Detractors

We again picked up the strong performance of Nvidia, which contributed +1.9% to the portfolio return following very good quarterly numbers. On the negative side, Alibaba, Tencent and Baidu were slightly off for the month as investors focused on Donald Trump's anti-China trade stance. Actually, there is only a small dollar value of these businesses which is US-reliant, so the weakness did not hold.

About Loftus Peak

Loftus Peak is a global fund manager with a focus on investing in listed disruptive businesses. Our team's extensive experience of successfully investing in disruptive businesses brings significant discipline to the investment process.

The Fund, which includes large capitalisation names like Apple, Google and Alibaba, is constructed on the basis of strict criteria, giving investors exposure to the some of the best and fastest-growing companies in the world, at carefully determined valuations. This kind of geographical and sectoral diversification lowers the concentration risk inherent in the typical Australian portfolio, with its heavy skew toward banks, resources and the Australian dollar.

We believe self-managed super funds, and investors generally, want a professionally-managed portfolio that gives them access to these important secular trends.

The Team

The portfolio is managed by Alex Pollak and Anshu Sharma.

Alex Pollak: CEO, CIO and Founder

With 25 years experience in disruptive business models gained during a career with Macquarie Bank, Alex heads one of the best-performing teams in global listed disruptive business investment in Australia.

He was instrumental in bringing both Seek and Carsales.com.au to

the Australian stock market. His deep knowledge of investment and global change companies means you are ideally placed to benefit financially from the movements in technology which are daily changing the face of markets.

Anshu Sharma: Portfolio Manager

Anshu started his career in global disruption investment almost a decade ago at TechInvest. This was followed by Portfolio Manager and TMT Analyst responsibilities for the Asia region at Eight Investment Partners.

Being mentored by the best in this space early on in his career

and having extensively travelled in Asia to meet hundreds of companies, Anshu brings a wealth of experience to investing globally.

He has an M.Comm from the University of New South Wales and a B.Comm (Hons) from Delhi University. He holds the CIPM® certificate and the Chartered Financial Analyst® designation.
