

LOFTUS PEAK GLOBAL CHANGE MODEL PORTFOLIO

QUARTERLY REPORT

30 September 2016

The Loftus Peak Global Change Model Portfolio is a Separately Managed Account available through the Mason Stevens Investment and Administration Service.

MARKET AND PORTFOLIO REVIEW

The portfolio delivered a return of +12.76% net of fees for the three months to 30 September 2016, outperforming the benchmark by +10.43%. Loftus Peak investors had a strong September quarter, with a solid performance in a number of our thematic areas including mobility, artificial intelligence, virtual reality, search, retail and China as quarterly profit numbers revealed good growth in sales and profits. The strongest contributor in the quarter was Nvidia, a company we have invested in as a key part of the solution in virtual reality, artificial intelligence, gaming and autonomous vehicles.

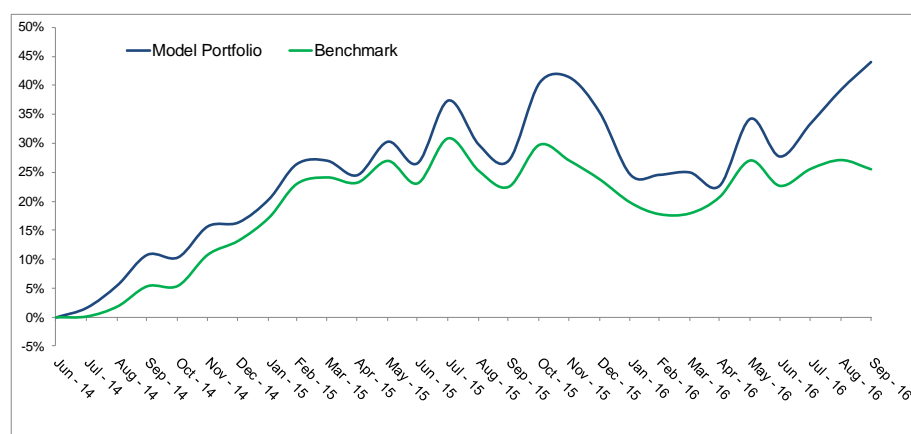

Apple, our largest position, was the second best performer in the quarter on the release of the iPhone 7, which met with greater demand than was expected. It is clear from the new phone that the company is preparing users for a future which will see more search performed through voice, with the implications increasingly clear in the artificial intelligence that this will require. Alibaba performed well, as investors reassessed the company's growth path in China, and now its potential throughout South East Asia and India.

We had a poor result from Tesla, which was a result of the announcement of the merger with Solar City. The Australian dollar was flat for the period, and is actually up almost 10% since a year ago, meaning our performance would have been better had it stayed low at levels of 1 year ago.

PERFORMANCE SUMMARY[^]

Period	Model Portfolio	Benchmark*	+/- Return
1 month	3.39%	-1.25%	4.65%
3 months	12.76%	2.33%	10.43%
1 year	13.39%	2.48%	10.92%
Annualised return since inception (pa)	17.58%	10.63%	6.96%

Performance Since Inception[^]

Top Five Holdings

Security	%
Cash	11%
Apple Inc (AAPL)	10.5%
Alphabet In (GOOGL)	7.0%
Amazon.com Inc (AMZN)	6.9%
Comcast Corp (CMCSA)	6.9%

*The Model Portfolio Benchmark is the MSCI ACWI (net) (as expressed in AUD from Bloomberg). [^]Returns are calculated net of management, performance, administration/ custody and transaction fees, but excluding any adviser fees from the Model Portfolio's inception date of 30/6/14, and assumes reinvestment of all income (but not franking credits). +Not annualised. Returns are based on the theoretical performance of a portfolio which implemented the Model Portfolio based on simplifying assumptions and stock weightings. Actual individual returns of each client's portfolio will differ depending on factors such as date of initial investment, timing of transactions, contributions and withdrawals, fees and any customisations. Performance includes dividends attributed to the quarter but not yet paid; actual performance may differ due to the foreign exchange rate applied at payment and by any applicable withholding tax assessed. Past performance is not a reliable indicator of future performance and may not be achieved in the future. Each client should also take into account their own taxation situations. All information provided in this Report is correct as at the date of this Report.

INVESTMENT OBJECTIVE & STRATEGY

The Loftus Peak Global Change Model Portfolio (Model Portfolio) aims to deliver a return over the MSCI ACWI (net) (as expressed in AUD from Bloomberg), over the medium to long term by bringing a disciplined investment process to listed global companies impacted by change.

Technology is changing the world, with the leap now analogous to that which took place during the industrial revolution. Over the past 20 years, technology and innovation have changed the face of major sharemarkets globally. The Model Portfolio will attempt to harvest return from this thematic.

The Model Portfolio offers investors the opportunity to potentially profit from the rapid, exponential growth in innovation. The Model Portfolio follows a long-only strategy that will result typically in 10-30 investments. It will also be able to move to around 50% cash from time to time, when the sharemarket is judged to be overvalued.

KEY FEATURES

FEATURE	DETAIL
Investment universe	Listed global equities
Benchmark	MSCI ACWI (net) (as expressed in AUD from Bloomberg)
Number of investments	10-30
