Loftus Peak Global Change Portfolio

Global Change. Listed Investments. Daily Liquidity.

Monthly Investor Letter
March 2017

The Loftus Peak Global Change Portfolio invests in listed disruptive businesses globally. The portfolio provides geographical and sectoral diversification which lowers the concentration risk inherent in the typical Australian portfolio, with its heavy skew toward banks, resources and the Australian dollar.

Review & Outlook

The Fund manager estimated return gross of fees* was +4.44% for March 2017, which was +2.39% above the benchmark (MSCI AC World Net Total Return Index in Australian dollars). The benchmark returned +1.65% for the month.

March saw a recovery in the disruption thematic as markets recognised that even significant political changes globally would not slow the pace of growth in these emerging business models.

Portfolio Contributors and Detractors

Baidu was a minor detractor. The company is struggling, having lost its head of machine learning, Andrew Ng, at a critical time, with several other management changes coupled with commentary about a confusing executive structure.

Machine learning is an important area for the company – it has been investing heavily since 2014, with services in voice search, pattern recognition, image analysis indoors and in streetscapes and autonomous driving to name only a few. The field is an important one for Baidu, since search is extending beyond text base into images. Understanding the elements within an image means that more data can be harvested for the user and ultimately made actionable. The company has made a number of investments in this field, but none have yet translated into meaningful revenue.

*Manager estimated returns. The Portfolio Benchmark is the MSCI ACWI (net) (as expressed in AUD from Bloomberg). Portfolio Inception date is 30/06/14. All returns are shown to two decimal places. Returns for the periods more than one year are annualised. Total returns include realised and unrealised gains. Valuations are computed and performance reported in Australian dollars. Gross-of-fees performance returns are presented before management and performance fees but after all trading expenses. Net-of-fees performance returns are presented after management and performance fees. Returns are based on the theoretical performance of a portfolio which implemented the Model Portfolio based on simplifying assumptions and stock weightings. Actual individual returns of each client's portfolio will differ depending on factors such as date of initial investment, timing of transactions, contributions and withdrawals, fees and any customisations. Past performance is not a reliable indicator of future performance and may not be achieved in the future. Each client should also take into account their own taxation situations. All information provided in this Report is correct as at the date of this Report.

Apple again performed well, while Nvidia also had a strong month as it recovered from a recent fall below US\$100. Telit was a good performer for the month as the company's products are now being seen as a global leader in IOT enablement. For example, the company's sensors enable factory owners to pro-actively manage maintenance by tracking abnormalities including vibration and temperature on equipment, reducing down time and improving profitability.

The Australian dollar was a positive for us this month, depreciating by -0.78%.

About Loftus Peak

Loftus Peak is a global fund manager with a focus on investing in listed disruptive businesses. Our team's extensive experience of successfully investing in disruptive businesses brings significant discipline to the investment process.

The Fund, which includes large capitalisation names like Apple, Google and Alibaba, is constructed on the basis of strict criteria, giving investors exposure to the some of the best and fastest-growing companies in the world, at carefully determined valuations. This kind of geographical and sectoral diversification lowers the concentration risk inherent in the typical Australian portfolio, with its heavy skew toward banks, resources and the Australian dollar.

We believe self-managed super funds, and investors generally, want a professionally-managed portfolio that gives them access to these important secular trends.

The Team

The portfolio is managed by Alex Pollak and Anshu Sharma.

Alex Pollak CEO, CIO and Founder

With 25 years' experience in disruptive business models gained during a career with Macquarie Bank, Alex heads one of the best-performing teams in global listed disruptive business investment in Australia.

He was instrumental in bringing both Seek and Carsales.com.au to the Australian stock market. His deep knowledge of investment and global change companies means you are ideally placed to benefit financially from the movements in technology which are daily changing the face of markets.

Anshu Sharma Portfolio Manager

Anshu started his career in global disruption investment almost a decade ago at TechInvest. This was followed by Portfolio Manager and TMT Analyst responsibilities for the Asia region at Eight Investment Partners.

Being mentored by the best in this space early on in his career and having extensively travelled in Asia to meet hundreds of companies, Anshu brings a wealth of experience to investing globally.

He has an M.Comm from the University of New South Wales and a B.Comm (Hons) from Delhi University. He holds the CIPM® certificate and the Chartered Financial Analyst® designation.
