

LOFTUS PEAK

Loftus Peak Global Disruption Fund (Class A)

MONTHLY UPDATE

JULY 2026

Loftus Peak is a global equities fund manager focused on disruptive businesses. Founded in 2014, Loftus Peak invests in global companies driving industry change, such as Nvidia, first bought in 2016. As well as Microsoft and Broadcom, the diverse portfolio also includes many less well-understood companies which are expected to be household names in the future, such as Advanced Micro Devices and CATL. This global approach aims to reduce concentration risk often associated with home-biased Australian portfolios.

	1m	3m	6m	1y	3y p.a.	5y p.a.	7y p.a.	Inception p.a.

Source: Loftus Peak, MSCI. Past performance is not a reliable indicator of future performance. Returns greater than one-year are annualised. Net-of-fees performance for the Fund is based on end-of-month redemption prices after the deduction of fees and expenses and the reinvestment of all distributions. Investment return and the principal value fluctuate, so your units, when sold, may be worth more or less than the original cost. For further details, please refer to the Fund's Product Disclosure Statement, Information Booklet and Target Market Determination. The data source for the Fund's benchmark was changed from Bloomberg to MSCI effective 29 February 2024. All data prior to this date remains unchanged. Loftus Peak Pty Limited replaced Orca Funds Management as the Investment Manager of the Fund on 1 March 2024.

Review and Performance

July was a highly volatile month with significant share price movements in both directions for many investee companies. Market analysts have characterised the month as the largest, fastest and deepest momentum movement in recent market history, eclipsing prior unwinds seen during the dot-com bubble in 2000 and the global financial crisis in 2009. Goldman Sachs' US High Beta Momentum basket fell over 37%, the highest move on record.

The value of the Fund decreased -5.7% (net-of-fees) in July, while the benchmark MSCI All Countries World Index (net dividends reinvested) in Australian dollars was down -1.3%, generating Fund underperformance of -4.4% (net-of-fees).

The major issue was burgeoning spending on the part of AI companies. For example, hyperscalers **Google**, **Amazon** and **Microsoft** are estimated to invest as much as ~US\$900 billion in 2028 (from a base of ~US\$300 billion in 2025) to build datacentres and install the chips produced by **TSMC** for **Nvidia**, **Broadcom** and others. The hyperscalers are in talks with debt markets to provide these funds, since their own substantial operating cashflows will be insufficient.

Equally important has been the related hike in the cost of memory, which (perversely) caused **Micron**, **Seagate** and **SanDisk** to fall -30.0%, -12.5% and -47.3% respectively (although in fairness these falls came after huge upward movements in those companies' share prices over the past year). These very large movements were also tied to the collapse of a \$45 billion hedge fund Situational Awareness (the irony in the name was, apparently, unintentional).

Key Facts

Inception Date	25 July 2017
APIR Code	PIM4432AU
Fund FUM (AUD)	\$173 million
Strategy FUM (AUD)	\$1,445 million
Product Type	Registered Managed Investment Scheme domiciled in Australia
Responsible Entity	The Trust Company (RE Services) Limited ("Perpetual")
Investment Universe	Listed Global Equities
No. of Investments	15-35
Benchmark	MSCI All Countries World Index (net dividends reinvested) in Australian dollars
Cash & Cash Equivalents	Up to 20%
Suggested time frame	3-5 years
Minimum Investment	\$5,000
Platforms	HUB24, Xplore Wealth and Powerwrap

Contributors and Detractors to Return

Investor concern about the size of the funding requirements for AI dragged down the performance of TSMC which produced a -1.3% contribution to the Fund with memory maker SanDisk and GPU competitors **AMD** and **ASML** each resulting in a -0.8% and -0.7% contribution, respectively, to Fund return. The thinking here is simple. If there is a hiccup in financing the rollout, then it is possible that demand for the GPUs, CPUs and memory will fall short of that which the stock market has pencilled in.

So it was that the best performers for the first month of the new fiscal year, only emerged once there had been clarification on the way the spending would unfold. Microsoft’s Satya Nadella and Amazon’s Andy Jassy, both CEOs, spoke of the monetisation models for AI, confirming that the uptake of AI services through the cloud platforms continues to grow above expectations.

Specifically, Microsoft’s cloud platform showed revenue growth in the quarter of +43% over the prior corresponding quarter with Amazon at +37% and Google at +82%. Only after this did Microsoft and Amazon rally strongly (adding a combined +1.0% to Fund value) assisted by a small bounce in Google, the third of the three hyperscalers.

The Fund has also been active in China, with car maker **BYD** adding +0.3% to return on strong export volumes, while battery maker **CATL**, which is the Fund’s third largest position delivering a negative return of -0.8%, having retraced some of its earlier strong gains. **Eli Lilly** was also weaker (-0.3%) while the cancer drug company **Revolution Medicines** consolidated recent strong gains.

Eli Lilly has been a solid performer for the Fund since it was first included in April 2024 at around 1%. It now holds a 6.2% position, having contributed around +2.5% to value in the portfolios managed by Loftus Peak over the life of the holding, making it the twelfth largest contributor.

The investment was initiated not just because of its importance as a weight-loss aid, but for its long-term impacts on health. The relationship between obesity and serious follow-on diseases affecting the heart, liver and kidney is well understood. All of this is before considering its importance in controlling type 2 diabetes. These considerations were significant in the decision to lift the company’s weight so that it is now the fourth largest position.

The Australian dollar appreciated +1.4% against the US dollar over the month, decreasing the value of the Fund’s US-dollar denominated positions. At month-end, the Fund carried a foreign currency exposure of 99.5%.

Fees	
Management Fees & Costs	1.45% per annum (inc. GST net RITC)

Unit Prices	
Pricing Frequency	Daily
Date	31 July 2026
Entry Price (in AUD)	3.2926

LOFTUS PEAK MONTHLY UPDATE

Cumulative Performance

Past performance is not a reliable indicator of future performance.

Benchmark is MSCI All Countries World Index (net dividends reinvested) in Australian dollars.

Portfolio Exposure

- AI and Data Infrastructure (25.8%)
- Cloud and Software (14.8%)
- Digital Media (14.3%)
- Internet of Things and Robotics (12.6%)
- New Energy (11.6%)
- Platforms and Ecommerce (10.1%)
- Health and Life Sciences (10.1%)
- Cash & Cash Equivalents (0.6%)

Portfolio Construction

At month end, the Fund was 99.4% invested with the balance in cash and cash equivalents exposure. The Fund has a high exposure to large capitalisation names which are highly cash generative with strong balance sheets. Focusing on high quality companies helps the Fund to withstand difficult periods in the market and drive strong, long-term outcomes for investors.

Portfolio Statistics

Large Cap	\$50-100b	4.1%
Mid Cap	\$2-50b	10.6%
Small Cap	< \$2b	0.0%

³ Since inception.

Top 10 Holdings (in alphabetical order)

Amazon – is the global leader in internet retail and cloud-based computing. From its listing in 1997 as primarily an online book retailer, Amazon has now expanded its offering to most areas of consumer merchandise, whilst also developing market leading cloud computing services. It has a relentless focus on low-cost operations, constant reinvestment and customer service.

ASML – is the world's leading supplier of photolithography equipment used to manufacture advanced semiconductors. The company is the sole producer of extreme ultraviolet (EUV) lithography systems, which are essential for producing leading-edge chips used in AI, smartphones, and high-performance computing. ASML's product portfolio also includes deep ultraviolet (DUV) lithography systems, and computational lithography software. Its customers include the world's largest chip manufacturers, such as TSMC, Samsung, and Intel. As semiconductor complexity continues to increase, ASML plays a critical role in enabling advances in AI, computing, and the broader digital economy.

Broadcom – is a leader in wireless, datacentre networking, AI chips, storage, and infrastructure silicon/hardware/software with broad-based exposure to positive trends in these end markets. Broadcom is a technology infrastructure powerhouse with semiconductor leadership positions in AI (#2 global AI semiconductor supplier), custom chip ASIC supplier, cloud datacentre/telco networking, wireless and enterprise storage.

CATL – founded in 2011 and headquartered in Ningde, China, is the world's largest producer of lithium-ion batteries for electric vehicles and energy storage systems. The company supplies batteries to leading global automakers including Tesla, BMW, Mercedes-Benz, Hyundai, and Toyota. CATL's core products include lithium iron phosphate (LFP) and nickel manganese cobalt (NMC) battery chemistries, and it is at the forefront of innovations in solid-state batteries and cell-to-pack architecture. With operations spanning China, Europe, and other key EV markets, CATL plays a central role in the global energy transition and electrification of transport.

Eli Lilly – founded in 1876 and headquartered in Indianapolis, Indiana, is a global pharmaceutical company known for its innovations in drug development. The company focuses on therapeutic areas such as diabetes, oncology, neuroscience, and immunology, with blockbuster drugs including Trulicity and Mounjaro for diabetes and Zepbound for weight loss. Eli Lilly is also a leader in Alzheimer's research, developing treatments like Donanemab to address cognitive decline. Leveraging biotechnology and advanced research, the company continues to drive medical breakthroughs in both small molecules and biologics. With a strong pipeline and growing presence in obesity and metabolic health, Eli Lilly is shaping the future of healthcare innovation.

Meta – is one of the world's premier advertiser platforms with a user base of over 3bn Daily Active Users and over 10m advertisers. META has invested significantly into AI infrastructure, and this enables the company to drive user engagement and provides advertisers with a range of ad automation and targeting tools. META's two major goals are to: (1) to build the most popular and advanced AI products and services; and (2) invest into building the next generation of augmented, virtual and mixed reality computing platforms.

NVIDIA – founded in 1993 and headquartered in Santa Clara, California, is a leading technology company specialising in graphics processing units (GPUs) and artificial intelligence (AI). Originally known for its dominance in gaming GPUs, Nvidia has expanded into AI, datacentres, autonomous vehicles, and professional visualisation. Nvidia's AI and deep learning technologies power industries ranging from healthcare to robotics, enabling breakthroughs in generative AI and high-performance computing. With its continuous innovation in AI chips and software ecosystems like CUDA, Nvidia remains at the forefront of the AI and semiconductor industries.

Spotify – founded in 2006 and headquartered in Stockholm, is the world's leading music streaming platform. Its sole focus is on audio (unlike competitors where audio offerings are an after thought), which means that it can launch unique products ahead of the competition and deliver a better user experience. The company uses a freemium model funnels free, ad-supported listeners into paid subscriptions. Spotify has over 750 million users and leverages this scale to enter new markets like audiobooks and podcasts.

Taiwan Semiconductor – is the largest dedicated global foundry for the manufacture of semiconductor chips. TSMC produces chips for a wide range of uses including datacentres, networking equipment, smartphones, tablets, PCs and gaming consoles. TSMC has a broad customer base of major hardware and fabless semiconductor companies including Apple, Qualcomm, Nvidia, AMD, MediaTek and HiSilicon (Huawei). The company is leveraged to chip demand from emerging themes such as 5G, IoT and artificial intelligence. TSMC was founded in 1987 and is based in Hsinchu, Taiwan.

Uber – is a global technology company that revolutionised ride-hailing and expanded into mobility, delivery, and freight services. Its core platform connects riders with drivers through its app, offering services such as UberX, Uber Comfort, and Uber Black. Uber also operates Uber Eats, a food delivery service, and Uber Freight, a digital platform that connects shippers and carriers for logistics solutions. The company leverages AI, real-time data analytics, and dynamic pricing to optimise driver-rider matching, route efficiency, and demand forecasting. Uber continues to expand its offerings, including autonomous vehicles and electric micromobility solutions.

Research Ratings

IMPORTANT INFORMATION: This report was prepared and issued by Loftus Peak Pty Limited ("Loftus Peak"). The Trust Company (RE Services) Limited ("Perpetual") (ABN 45 003 278 831, AFSL 235 150) is the responsible entity of the Loftus Peak Global Disruption Fund (Class A). This document has been prepared for the purpose of providing general information only, without taking account of any individual person's investment objectives, financial circumstances or needs. This document is not intended to take the place of professional advice and we do not express any view about the accuracy or completeness of information that is not prepared by us and no liability is accepted for any errors this document may contain. You should consider the Product Disclosure Statement ("PDS") in deciding whether to acquire, or continue to hold, the product. A PDS, information booklet and application form are available at www.loftuspeak.com.au. Loftus Peak and Equity Trustees do not guarantee the performance of the Fund or the repayment of the investor's capital. To the extent permitted by law, neither Perpetual, Loftus Peak, nor any of their related parties including its employees, directors, consultants, advisers, officers or authorised representatives, are liable for any loss or damage arising as a result of reliance placed on the contents of this report. Past performance is not indicative of future performance.

The Loftus Peak Global Disruption Fund (Class A)'s Target Market Determination is available at www.loftuspeak.com.au in the downloads tab. It describes who this financial product is likely to be appropriate for (i.e. the target market), and any conditions around how the product can be distributed to investors. It also describes the events or circumstances where the Target Market Determination for this financial product may need to be reviewed.

Zenith Rating: The Zenith Investment Partners (ABN 27 103 132 672, AFS Licence 226872) ("Zenith") rating (PIM4432AU assigned 27 Nov 2025) referred to in this piece is limited to "General Advice" (s766B Corporations Act 2001) for Wholesale clients only. This advice has been prepared without taking into account the objectives, financial situation or needs of any individual, including target markets of financial products, where applicable, and is subject to change at any time without prior notice. It is not a specific recommendation to purchase, sell or hold the relevant product(s). Investors should seek independent financial advice before making an investment decision and should consider the appropriateness of this advice in light of their own objectives, financial situation and needs. Investors should obtain a copy of, and consider the PDS or offer document before making any decision and refer to the full Zenith Product Assessment available on the Zenith website. Past performance is not an indication of future performance. Zenith usually charges the product issuer, fund manager or related party to conduct Product Assessments. Full details regarding Zenith's methodology, ratings definitions and regulatory compliance are available on our Product Assessments and at Fund Research Regulatory Guidelines.

MSCI Benchmark Source: MSCI. Certain information contained herein (the "Information") is sourced from/copyright of MSCI Inc., MSCI ESG Research LLC, or their affiliates ("MSCI"), or information providers (together the "MSCI Parties") and may have been used to calculate scores, signals, or other indicators. The Information is for internal use only and may not be reproduced or disseminated in whole or part without prior written permission. The Information may not be used for, nor does it constitute, an offer to buy or sell, or a promotion or recommendation of, any security, financial instrument or product, trading strategy, or index, nor should it be taken as an indication or guarantee of any future performance. Some funds may be based on or linked to MSCI indexes, and MSCI may be compensated based on the fund's assets under management or other measures. MSCI has established an information barrier between index research and certain Information. None of the Information in and of itself can be used to determine which securities to buy or sell or when to buy or sell them. The Information is provided "as is" and the user assumes the entire risk of any use it may make or permit to be made of the Information. No MSCI Party warrants or guarantees the originality, accuracy and/or completeness of the Information and each expressly disclaims all express or implied warranties. No MSCI Party shall have any liability for any errors or omissions in connection with any Information herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. The Loftus Peak Global Disruption Fund (Class A) is designed in a benchmark unaware manner. The Investment Manager believes the MSCI ACWI index is appropriate for comparison purposes given the Fund invests in companies across a range of industries including technology, renewable energy, consumer, communication services and healthcare. The risk/return profiles of the Fund and benchmark differ due to differences in the constituents of each. The Fund's objective is to provide investors with capital growth over the long-term through exposure to companies that benefit from disruptive innovation – in or from any industry/sector, including emerging market listed investments.
